Course Name: Probability and Statistics

Topic: Daily Study Hours of UCU Students

Department of Computing & Technology Semester: Advent 2025

OBJECTIVES

- To design and execute a field data collection exercise on student study habits.
- To organize and summarize both grouped and ungrouped data.
- To compute descriptive statistics such as mean, median, and standard deviation.
- To visualize findings using statistical software (Excel and Python).
- To write and present a well-structured scientific report.

METHODOLOGY

The study was conducted using a structured questionnaire distributed to a random sample of 63 UCU students. The population consisted of available students we reached out on campus in various places such as dining hall, computer labs, halls and hostels to mention but a few. Data was collected through face-to-face interaction. We were able to reach out to students in various courses such as Law, BSIT, BSCS, BSDC and Civil Engineering among others.

Each respondent provided details such as gender, course, and daily study hours. Quantitative data (study hours) were analyzed using Excel to obtain descriptive statistics. Ethical considerations such as consent and confidentiality were observed throughout the process.

UNGROUPED DATA FOR HOURS SPENT IN STUDIES PER DAY.

Study Hours(Per Day)	Frequency
1	2
2	4
3	3
4	10

5	6
6	3
7	3
8	8
10	4
12	4
14	2
15	2
16	1
18	2

GROUPED DATA

CLASS INTERVAL (HRS.)	FREQ UENC Y	MIDPOINT(X)	CUMUL ATIVE FREQUE NCY	Fx	Fx²
0-1.99	2	1.0	2	2	2
2-3.99	7	3.0	9	21	63
3-5.99	16	5.0	25	80	400
6-7.99	6	7.0	31	42	294
8-99	8	9.0	39	72	648
10-11.99	4	11.0	43	44	484

12-13.99	4	13.0	47	52	676
14-15.99	4	15.0	51	60	900
16-17.99	1	17.0	52	17	289
18-19.99	2	19.0	54	38	722
Totals	54			428	447 8

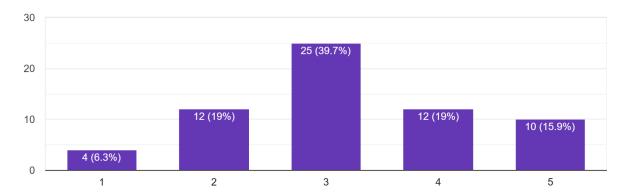

Descriptive Statistics for Grouped Data Grouped Frequency Distribution

STATISTIC	FORMULA	VALUE	INTERPRETATION
Mean		428 / 54 = 7.9 3 hrs	On average, a UCU student studies about 8 hours
	Σfx / Σf		per day
Median		= 6 + ((27 - 25)/6)×2 = 6.67hrs	The middle 50% of students study around 6–7 hours
			daily
	L + ((N/2 - CFbefore) / fm) × c		

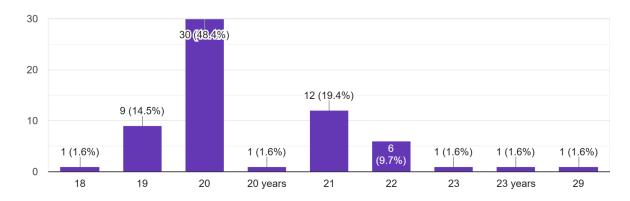

Mode		= 4 + ((16-7) / (32-7-6)) \times 2 \approx 4.95 hr	The most common study duration is about 5 hours
	L + ((fm - f1) / (2fm - f1 - f2)) × c		
Range	Highest – Lowest	19 - 1 = 18 hrs	Indicates wide variation in study habits
Variance (s²)	(Σfx² / N) – (x̄)²	(4478 / 54) - (7.93) ² = 82.92 - 62.88 = 20.04	Shows data spread
Standard Deviation (s)	√Variance	√20.04 = 4.48 hrs	

SCALE

On a scale of 1–5, how disciplined are you in following your study schedule?_____63 responses

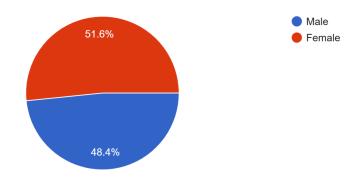

AGE 62 responses

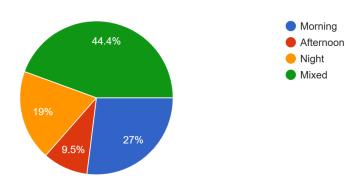

Gender

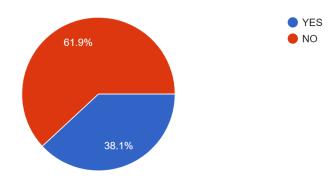

62 responses

When do you mostly study? () Morning () Afternoon () Night () Mixed $_{\rm 63\,responses}$

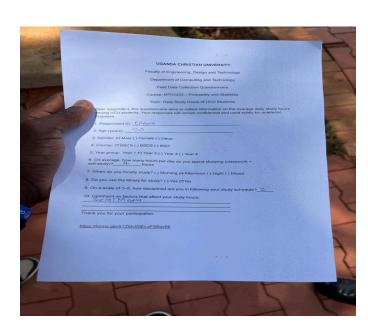

Do you use the library for study? () Yes () No $_{\rm 63\,responses}$

IMAGES SHOWING OUR GROUP COLLECTING DATA USING THE QUESTIONNAIRE PAPER

CONCLUSION

The study concludes that the average UCU student studies about four hours per day. While most students maintain a consistent schedule, some show very low or very high study times. We recommended that students develop balanced study routines and utilize library resources effectively. Further research could compare study hours with academic performance to identify deeper trends.
